

WW2 Armed Forces Demo README

Thanks for downloading this asset!

Frequently asked questions and their answers will be added to the FAQ below, if you have a question that is not listed, want to provide any other feedback, want to request a specific model for a future update or want to showcase anything you made using the asset, feel free to send me an email at jonahhessel@gmail.com

Frequently Asked Questions (FAQ):

Q: I want more of these 3D models for my project, where can I get them?

A: You can find links to all of my existing asset packs [on the Unity Asset Store](#), or [on my website](#).

Q: All models are completely purple, how do I fix this?

A: As of update 2.3.0, the materials in this asset pack are configured for the Universal Render Pipeline (URP), and you have probably added the pack to a project using the Built-in Render Pipeline (BiRP). Unity has marked BiRP as deprecated, and support may be dropped in the future, which is why I'm upgrading all materials to URP standards. To downgrade the materials, just select all of them and change the material shader from *Universal Render Pipeline/Lit* to *Standard*.
